Declaration

We have been carefully handling the manual and trying our best to ensure the accuracy of the contents of this manual. But we still can't promise it is always correct due to our products are being improved and updated all the time. The contents of this manual will be updated without notice at any time.

All of our products must be used under environments/locations which are taken care by human being. We are not responsible for any loss or damages caused by any accident while the products are used without taken-care by human being. If there are any products failures caused by human behaviors or natural disaster, we will not provide or just provide partial free maintenance.

Please contact local agents for the latest information of the products.

Notes on safety

This section presents important information intended to ensure safety and effective use of the printer. Please read carefully.

- ▶ Be sure to use the specified battery and power source provided by our company. Connection to an improper power source may cause fire, explosion or damage to the printer.
- ▶ Don't put the battery into the fire or water, don't disassemble or modify the battery, don't be short circuit, otherwise may result in injury or fire even explosion.
- ▶ Please don't open the paper room cover when it is printing or just when printing is over, do not touch the print head with hand or body, overheated may cause scald.

Notes on using

1. Do not store the printer in hot and humid conditions.
2. The lithium battery has a character that if it is not used for several months, it possibly can't be charged ever. So for that, we suggest to use the adapter what less than 1A for charging.
3. The printer's power adapter is to be connected to a stable power 110~220 Volts, please do not use other devices on the same power socket, to avoid voltage fluctuations.
4. Avoid water or conductive material (for example: metal). If water is present on the surface please turn off the power immediately.
5. Please ensure that a thermal paper roll is always inserted in the printer to avoid damaging the printing roller and the printer head.
6. Please ensure that your printer is serviced and repaired by a qualified technician. No responsibility is taken for misuse and/or non-qualified servicing.
7. In order to ensure print quality and longevity of your printer, please ensure that only good quality thermal paper rolls are used.
8. Please keep this manual in a safe place, where it can be accessed easily and used for your reference.

80MM Portable MINI Thermal Printer

1. Features & Application area

1. Features

- It can print 80mm width thermal paper
- Paper dimensions 40mm
- High-speed, Clear printing
- Super power lithium electricity, standby time can reach 5-6 days
- Auto sleep, auto awake, save electricity
- Small size, light weight, reliable performance, simple to connect, easy to use

2. Application area

Relative to the traditional thermal receipt printer, Mini portable printer has smaller body, more reliable capability, more convenient printing and portable advantages. The Mini printer can be worked on a lots of locations, such as the TAXI bill printing, administrative fees receipt printing, post receipt printing, restaurant ordering information printing, online payment information printing, etc. With the rapid popularity of smart-mobile, Mini printer will be more widely used in the near future.

2. Specification

PrintingMethod: Direct Line Thermal

Speed: ≤90mm/sec

Reliability TPH Life: 100000000 pulse / dot or 100km

Resolution: 203DPI (8dot/mm)

Printing Width: 72mm (576dot)

Paper Width: 79.5±0.5mm

Paper thickness: 0.06-0.08 mm

Roll Diameter: φ≤40mm

Power: rechargeable lithium battery/NI-MH battery

Battery: 7.4VDC, 2000mAh

Charging method: external charger

3.Appearance

80MM Portable MINI Thermal Printer

Size:103*100*46mm
Weight:260g(with Battery)

Size:102*108*43.5 mm
Weight:285g(With Battery)

4.Communication Interface

- 1. RS232(COM) : standard RS232 Communications Protocol
- 2. USB : standard USB Communications Protocol
- 3. Bluetooth 2.0: General Bluetooth2.0 Communication Protocol
Two-mode Bluetooth: General Bluetooth2.0 / 4.0 Communication Protocol
- 4. WIFI: Standard 802.11b/g/n Protocol

5.The installation of the paper roll

The printer use 80MM thermal paper, and adopt to easy paper loading. So the paper is very convenient install.

Paper diameter Max 40mm.

Thermal paper installation method is as follows:

- (1) Open the printer top cover
- (2) Thermal Paper as follow Graph to put into paper storehouse

- (3) Put out a little of the paper outside printer,then close the top cover.
- (4) Use paper sawtooth tear off redundant paper

Display 1 or 2 shelf			Low power of Battery
Hold down power for 3 seconds			Printer OPEN/OFF

Under power on, the paper feeding begins when press [FEED] button	the printer paper feed
Power off the printer, then hold down the [FEED] button and press the power button at the same time. Wait 2 seconds ,then loosen the [FEED] button, the current setting will be printed out.	The printer Self test
Power off the printer, then hold down the [FEED] button and press the power button at the same time. Wait until the power indicator & [ERROR] led are both on, and then [ERROR] led goes off, then loosen the [FEED] button, the language setting status will be printed out.	Transformation in both English and Chinese
Power off the printer, then hold down the [FEED] button and press the power button at the same time. Wait until the power indicator & [ERROR] led are both on, and then [ERROR] led goes out, after, [ERROR] led goes on again ,then loosen the [FEED] button, the density setting status will be printed out. (It has three levels setting for printing density, it is a circle Low levelMiddle levelHigh levelLow level..., Please switch the density status by repeating operation presented above.)	Set printing density
Power off the printer, hold down the [MODE] button and press the power button at the same time. Wait until the power indicator & [ERROR] led are both on, and then [ERROR] led goes out, then loosen the [MODE] button. The printer turns into the hexadecimal printing mode and print the presentation.Way to quit hexadecimal printing : The way to quit hexadecimal printing mode is switch off the printer .	Hexadecimal printing

6.Operating Manual for Android OS

This manual applies to all of our android OS compatible printers (both 58mm & 80mm width printer)Currently, the common communication ports we used for android OS are (USB、Ethernet、Bluetooth and WiFi)

If you want to use Android Device connected with our printer, ifil you want to use Android Device connected with our printer, first of all make sure that printers can be supported Android Operate System, proceed as follows (Bluetooth as example):

Step 1:

- Insert the CD driver disc into the CD-ROM, connect your Android device with your computer;

Step 2:

- Find the File Named " SDK" from the CD driver, Then follow the path : "Android SDK--- BLUETOOTHDEMO ---bin---BT-POSPrinter.APK" , and install it into your Android device.

Step 3:

- Connect your Android device with our printer once the installation done .

Step 4:

- Find this icon  on the Android device, and click "Connect Printer" to search the Bluetooth printer, (Default pairing password for Bluetooth connection is " 1234 ") . After the connection successfully, click on the " Print Test Page" , the printer will work

If you use the "Ethernet interface", "USB", "WIFI" communication, replace "BLUETOOTHDEMO" from "Step 2" into the corresponding "NETDEMO", "USBDEMO" and "WIFIDEMO".

Please noted, the customers can get all the original code from below path if you need to develop your own APK (Path is:
src ▶ com ▶ zj ▶ printdemo)

80MM Portable MINI Thermal Printer

7.Operating Manual for IOS APP

1. Download the Test Tools "POS-PrinterV1.0" from App Store,as below:

(Image1)

2. Turn on the Bluetooth setting of IOS device , then click "POS-Printer":

(Image 2)

3. Into the App of "POS-Printer", select the paper width as below:

Instruction Manual

(Image 3)

4. Select the way of communication of printers, "Bluetooth" or "WIFI":

80MM Portable MINI Thermal Printer

5. If connect with Bluetooth, then you can click "Select Printer" first, you will search the "Bluetooth Printer" (the default name of printer is Bluetooth Printer), click it to be connected.

6. If connect with WIFI, please make sure that your device WIFI is connected with printer (both of them in the same Network segment). And then click the "Connect", enter into the printer IP :

Instruction Manual

7. If above steps are successful, then you can print text to have a test:

80MM Portable MINI Thermal Printer

8. Other features of this APP:

- ① Send HEX: In the text box, enter the hexadecimal data, click "Send HEX", then can send text box hexadecimal data to the printer.
- ② Print Image mode: input data in the text box, click "Print Image mode", you will be able to convert the contents of the text box into a image printed
- ③ Open Casher: If your printer is connected with the cash drawer, click "open cashier", the drawer will be opened (portable printers without drawer interface, this feature does not work).
- ④ Cut paper: After click on it, the paper will be feed out and cut (portable printers, 58 series of printers without cutter, this feature does not work).
- ⑤ Self Test: Click the "self-test", the printer will print out a self-test page (because the Bluetooth printer has been connected to the device, then] the Bluetooth name or MAC address will be not displayed in the self-test page).
- ⑥ Beep: Click the "Beep", the printer will beep sound (portable printers, 58 series of printers without buzzer, this feature does not work).
- ⑦ Print test page: Click the "Print Test Page", the text will print a section of the test, to confirm that the printer is connected and normal print successfully.

9. The applicable version: can be compatible with IOS6.0 or above versions.

8.The Bluetooth configuration

Step1: Make sure your device (like PC, Note Book) has Bluetooth function, then once the Bluetooth for your device is activated, you will see the Bluetooth sign showed in the right bottom side of your device(like PC) screen.

Instruction Manual

Step2:Power on the Bluetooth printer.

Step3:To add the Bluetooth printer, please left-click the  → click "Add a Bluetooth Device",then you will enter wizard screen , please choose "My device is set up according and ready to be found"click "Next"(showed as below).

Step4:if you can see screen as below,then the device is searching the bluetooth printer,please wait.

80MM Portable MINI Thermal Printer

Step5:Once the Bluetooth printer is found. You can see it listed on the screen, click "Next"

Step6:Choose "Let me choose my own passkey", then enter "1234"(this is factory default passkey, if you want to change it, you have to inform us to set the new passkey for you in our factory before shipping),then click "Next".

Instruction Manual

Step7:if you can see the screen as below, that means the Bluetooth printer is already connected. Please notice the assigned COM ports ,then Click"Finish".

(Note: The Bluetooth device will automatically assign a COM port.)

Step8: Now if you want to test if the printer is OK to print, you could use a com tool , and send printed data to Outgoing COM port(just as above image shown: COM5).

(Com tool setting is 9600,N,8,1.)

80MM Portable MINI Thermal Printer

9.How to use the ports of USB/Serial(RS232)

Note:

Ensure the printer is working before using, and paper is put on the warehouse.

1. Enter the DC driver, click the related files(printer driver software of 58mm/80mm series)and install.the installation language will be shown as below:

Instruction Manual

- 2、Select the language you need and click the button "Confirm",and show the imgae as below,then click the button "next step"

- 3、please read the related terms carefully,and install it as agreement as below

17

80MM Portable MINI Thermal Printer

- 4、Click"next step" ans show as below(customer is available for modifying channel of driver installation or default one)

- 5、Click the button"next step"again and show as below and install it:

18

Instruction Manual

6. After installation, the related interface will be shown as below, select operation system of your computer and printer model, click "USB port for testing", if you communication with USB port, USB port of computer will be identified automatically. Click the button "next step" and install continuously as below :

7. Click the button "Start Installation" and shown as below. And select installation:

19

80MM Portable MINI Thermal Printer

8. Finish the driver installation as below:

9.2 Serial port to be used (if you choose a serial print)

1. Open the Printer Properties screen, and then select the "Port" item, as shown below:

20

Instruction Manual

2. Select the list of ports "COM1" → "Configure Port", the printer factory default settings as shown below:

You can see the setting parameters of serial port from self-test page, Click "Apply", then click "OK" (Note: This setting must consistent with the setting parameters of serial port from the printer self-test page, otherwise it will be garbled case) appears as shown below:

21

80MM Portable MINI Thermal Printer

- Click "Apply" again.
3.Return to the "General" tab, click "Print Test Page" as shown below:

22

Instruction Manual

If the printer prints a normal page, then it shows that the work was successful.
If you feel the print speed is slow, please click on the "Device Settings" → "Print Mode" → Choose "soft font" button as shown below:

10.The WIFI configuration

- 80mm MINI Portable Bluetooth Printer WIFI parameters configured through a Browser, the steps are as follows:
- 1, Connect the printer with PC and switch on the printer.
 - 2, Find the wireless network and link it. Then find the file named "HF-LPB100" and link it - after successful connection , go to next step.
 - 3, Enter the IP address (10.10.100.254) into the PC browser, press Enter we can see as below:

23

80MM Portable MINI Thermal Printer

Enter " admin" for the user name and default password is also "admin".
Press ok and then Next:

24

Instruction Manual

Select "AP+STA mode", and save.

Note: When the module is selected to STA mode (NIC), then re-start the module, you can not reuse the wireless configuration, SSID number can not be found.

4, Select "STA Setting" as below;

The screenshot shows the 'STA Setting' configuration page. It includes fields for Network Name (SSID), Encryption Method (set to 'Disable'), Obtain an IP address automatically (set to 'Enable'), and IP Address, Subnet Mask, Gateway Address, and DNS Server Address. A 'Save' button is at the bottom. On the left, a sidebar lists System, Work Mode, STA Setting (which is selected), AP Setting, Other Setting, Account, Upgrade SW, Restart, and Restore.

5, Then click "Scan", it will appear selection as below:

The screenshot shows the 'Site Survey' interface under the 'STA Setting' tab. It displays a list of available wireless networks with columns for BSSID, Channel, and other details. A specific entry, 'TP-LINK_F901D1', is highlighted with a red box. At the bottom are 'OK' and 'Refresh' buttons.

80MM Portable MINI Thermal Printer

Above are all your current wireless network, select one of your wireless device available to be used, then click "OK".

6, Input the correct configuration within the dialog, as below:

This is a detailed view of the STA Setting configuration dialog. It includes fields for Network Name (SSID), Encryption Method (WPA2PSK), Encryption Algorithm (AES), Password, Obtain an IP address automatically (disabled), IP Address (192.168.1.105), Subnet Mask (255.255.255.0), Gateway Address (192.168.1.1), and DNS Server Address (10.10.100.254). A note on the right says 'IP should be set the same with the printer or by other devices'. A 'Save' button is at the bottom right.

STA setting is complete, click "save".

7, Select "Other Setting", setting as below:

This screenshot shows the 'Other Setting' configuration dialog. It includes fields for Serial Port Parameters Setting (Baud Rate: 57600, Data Bit: 8, Parity Bit: None, Stop Bit: 1, CTS/RTS: Enable) and Network Parameters setting (Protocol: TCP-Server, Port ID: 9100, Server Address: 192.168.1.105, TCP Time Out Setting: 300). Red arrows point to the 'Save' buttons in both sections.

Instruction Manual

After finish the setting, click "Save".

8, Restart the module, as below:

Module configuration is complete

9, Click computer "Start"→"Run", Input word "CMD", as below :

Input "ping 192.168.1.105 -t" as below

80MM Portable MINI Thermal Printer

If details shows as below , means connection is Ok

```
C:\>ping 192.168.1.105 -t
Pinging 192.168.1.105 with 32 bytes of data:
Reply From 192.168.1.105: bytes=32 time<1ms TTL=255
```

Return to the driver -" properties "- " port "-" add port ", consistent with the add ports :

WIFI port choose :

1,Open the Printer Properties screen, then select the "Port" item, as shown below:

Instruction Manual

2, Click "Port" to Select "Add Standard TCP/IP Printer Port Wizard", click "Next" to continue the installation.

3, Enter the IP address into "Printer Name" dialog, and click "Next" to continue the installation.

80MM Portable MINI Thermal Printer

4, Add the standard TCP / IP Printer Port Wizard, select the device type, and then click "Next" to continue the installation, See the following image:

5, Click "Finish" to complete the installation, see the following image:

Instruction Manual

6. Installation will return to "Properties" interface, and then select the correct IP port, click "Apply", you can now print a test page. See the following images:

7. Return to "General" and click "Print Test Page" as below:

80MM Portable MINI Thermal Printer

11.Cleaning of printer head

Cleaning of printer

When the printer has the following conditions, you should clean the printer head:

- ① The printer does not print clearly and the thermal paper is OK.
- ② The printer Print pages lengthways is not clear
- ③ It's getting too noisy while feeding paper or printing.

Printer head cleaning steps are as follows:

1. Power off the printer and open the paper room cover. Remove the thermal paper roll.
2. If the printer just finished printing , please wait for the print head to cool down.
3. With a soft cotton cloth dipped in ethanol (please make sure there is no dripping), wipe the thermal printer head gently and remove any dust or stains.

4. Wait for the complete evaporation of any ethanol, then place the thermal paper roll back in the printer and close the paper room cover, then print a test page.

Notes :

- When the printer maintenance must ensure that the power is shut down
- Hands or other metal tools away from the surface of the printer head,do not use tweezers to scratch the surface of the printer head and other sensitive parts.
- Do not use gasoline,acetone and other organic solvents for printer head cleaning.

12.General Troubleshooting

1: Why serial port printer printing messy code?

A: Ensure the baud rate setting in the PC is same as the printer baud rate.
(we can see printer baud rate from self test page)

2: Self printing test is ok, but printer does not work after driver installation.

A: Recheck the installation according to above installation wizard and see if we selected the right port or ask service center for advice if needed.

3: Malfunction of paper feeding?

A: Use soft brush to clean the paper sensor and try again or send it to the service center for repair.

4. Malfunction of the indicator light

A: Check the cable connecting way / adapter / power cord / switch on or off?
Or contact the service center for repair.

5. Messy code printing except Arabic numeral printing.

A: language switching incorrectly, please use our tool "IPrinter" (you can find it on the enclosed CD) to change the language what you want print.

6. Red indicator keep flashing during the printing.

A: Usually it is due to the high temperature of the print head. If printing stopped,please contact the service center for repair.

7. Printing speed is very slow for serial printer

A: follow this path and change the set accordingly : Driver -- Properties -- Device Settings -- Print Mode -- Print as soft font.

8. Water or other liquid spills into the printer

A: Cut off the power,we can dry the main board or printer head with a hair dryer, careful of the temperature (average 50 degree is ok)

9. The printer can't work

A : The battery maybe without electricity, please use power adapter to charge. Then you try to star the printer, if the printer has same problem, please send to service center for repair.

10. Can not search the Bluetooth printer

A : Please check the equipment "Bluetooth" function whether opened, the communication whether normal, then replug the printer "Bluetooth Module" try to connect and search "Bluetooth" again, if the probлом are still existed, please send the specified location repair.
